

# Fuel pick-up system

from Unipart Rail

Technology to save fuel and the planet.

Delivers 92% cleaner fuel to engines

Reduces fuel consumption by up to 5%

Reduces CO<sub>2</sub> emissions by up to 5%

Quick installation & zero maintenance

PERFORMANCE IMPROVEMENT PARTNER

# Run Clean. Drive Savings.

**The FuelActive pick-up system is a proven technology that delivers 92% cleaner fuel to engines, reducing contamination and increasing fuel efficiency.**

Standard diesel engines and storage units draw fuel from the bottom of the fuel tank where water, sediment, diesel bug and other contaminants settle. The FuelActive pick-up system draws fuel from the top of the fuel level, ensuring that only clean fuel enters the lines, eliminating the costly effects of fuel contamination.

As a result of only burning clean fuel, the thermal efficiency of the engine reduces fuel consumption, whilst maintaining factory-level emissions standards through its life cycle.

## Benefits of the FuelActive solution

**Reduce Fuel Consumption**

**Reduce component replacements**

**Reduce harmful Emissions**

**Increase machine uptime**

**Reduce unplanned maintenance**

**Reduce total cost of ownership**

Scan the QR to learn how the FuelActive solution is **reducing fuel consumption** and **carbon emissions** by **7% for Colas Rail**. Contact us to learn more at [Fuelactive@unipartrail.com](mailto:Fuelactive@unipartrail.com).
