PERFORMANCE IMPROVEMENT PARTNER

Install faster, work safer and improve the productivity of every possession window using the Gripple SwiftLine Rail Dropper.

The new game-changing SwiftLine Rail Dropper is faster, safer, and easier to install than anything else on the market - up to 8 times faster than traditional droppers.

Take control of electrification projects, get more done in every possession window and even bring forward project completion dates, due to the fast direct installation and the fact it comes as a plug-and-play system, pre-cut to length, eliminating the need to measure and assemble on site.

Minimal training is required to master the easy to use, tool-free dropper, making projects simpler and safer as a result of less time spent working at height or in the dark.

The SwiftLine Rail Dropper is fully Network Rail Product Approved and has been extensively tested ensuring long term durability and reliability.

Features & Benefits

- **Improve productivity of each possession window:** Fast to install, with no cutting or measuring on site.
- **Rapid Installation:** Up to 8 times faster than traditional overhead catenary droppers.
- **Reduce project durations:** Shorten project time frames thanks to faster install.
- **Robust and Reliable:** Network Rail Product Approved and extensively tested.
- **Easy to use:** Tool free installation with minimal training.
- **Reduced Safety Risks:** Less time working at height and in the dark.
- **Plug & Play:** Pre-assembled and adjustable ready to install.
- **Right first time:** Pre-cut and mechanically crimped to guarantee install.

Key Features

-
- 1 Corrosion resistant ceramic cam system – Grips and locks the catenary wire and can be adjusted allowing for easy horizontal movement
 - 2 VoltLock wedge system grips dropper cable and ensures connectivity
 - 3 Push button release allows for vertical adjustment
 - 4 Quarter turn catenary line fixing for quick easy tool-free installation
 - 5 Excess wire fixing creates integrated failsafe
 - 6 Auto-Torque pre-set clamp fixing for quick, reliable and tool free contact wire installation
 - 7 Dot maxtrix batch numbering for full traceability back to raw materials
 - 8 Pre-fused wire to prevent damage
 - 9 Machine crimped for reliability and durability
- Fully conductive housing, dropper and clamp system
 - Pre-cut ready to install
 - Corrosion and weather resistant materials used end to end
